DATA SHEET - GALVANIZED FORKLIFT TIPPING SKIP

Industrial lifting

Galvanized forklift tipping skip

Galvanized tipping skip with forklift pockets and wheels

The BB galvanized model is the perfect solution for the safe and efficient handling of industrial waste, chips, scraps, and debris. Thanks to the hot-dip galvanized finish, this container offers excellent durability and high resistance to corrosion, making it ideal for industrial environments exposed to harsh conditions.

The BB-ZN bucket is equipped with advanced safety features, including an anti-slip mechanism for forklift forks and an automatic discharge system, which can be activated directly by the operator from the forklift using a cord. The ergonomic design, combined with high-capacity load wheels, allows for easy movement both manually and with forklifts, ensuring convenience and safety during emptying operations, especially inside containers for the collection of industrial waste and scraps.

All BB-ZN buckets are manufactured and tested in compliance with UNI EN ISO 12100, UNI EN 349, UNI ISO 8686, UNI EN 10027, and UNI EN 10204 standards, ensuring the highest standards of safety and quality. Each product comes with an identifying metal label, a certificate of conformity, and an operation and maintenance manual. The BB-ZN model is also covered by a one-year warranty, as required by European Directives.

Choose the BB-ZN model for a reliable, safe, and durable solution in the management and disposal of industrial waste.
