DATA SHEET - GALVANIZED CRANE FORKS SAFETY CAGE

Crane accessories

Galvanized crane forks safety cage

Galvanized basket for pallet handling in combination with crane fork

Our basket for pallet handling fully complies with current regulations. Built with a strong emphasis on safety, it allows for the lifting of pallets without the risk of material falling, thanks to a closed sheet metal bottom and the presence of tight mesh metal on all sides. The basket is equipped with a door for inserting and removing the pallet with a crane fork and, on the opposite side, a half-opening door to facilitate the introduction or extraction of material, making it a practical and convenient container for retrieval operations. It is recommended to refer to European standard EN13155 for the correct use of the crate in conjunction with crane forks. This product is built and tested according to UNI EN 13155, UNI EN ISO 12100, UNI EN 13854, ISO 8686 and UNI EN 10204 standards and is issued with the appropriate metal ID plate, certificate of conformity, and user manual. All our products are covered by a one-year warranty (European Directive).
