DATA SHEET - THREE-PHASE BENCH SAW FOR WOOD WITH 450 MM DISC

Bench saws for wood

Three-phase bench saw for wood with 450 mm disc

Table saw with three-phase electric motor and 450 mm diameter blade

The SGM-45 and SGT-45 saw benches represent high-quality professional saws, equipped with a carbide-tipped blade with a diameter of 450 mm, adjustable in height to adapt to various applications. These saws, equipped with a belt-drive transmission to optimize motor torque and cutting capacity, can cut wood and similar materials with a maximum thickness of 170 mm. The versatility of these saw benches is evident in the choice of motors, with options available from 3 or 4 HP, in both single-phase and three-phase configurations, to adapt to different power supply configurations and power needs. All our machines are provided with a movable blade guard, reinforced sheet metal frame, carbide-tipped blade, and extendable work table. Upon request, a wheel kit is available to facilitate movement, even without the assistance of a second operator.
