Industrial lifting

Fork mounted hook

Fork mounted hook with safety swivel hook

The fork mounted hook is the solution that allows for quickly adding a functional lifting accessory to your forklift. The product is designed to be compatible with the forks, allowing for the lifting and transporting of loads of various sizes comfortably and safely, moving them from one workstation to another. Made with a sturdy steel frame, the fork mounted hook is equipped with two screws for locking onto the forks and a swivel lifting hook with safety latch. This design helps to increase safety levels, avoiding the risk of fork disengagement and preventing the accidental dropping of the lifted load. Upon request, we are able to produce this accessory with different load capacities and adapt the internal fork passage section according to your forklift specifications. This product is built and tested according to UNI EN 13155, UNI EN ISO 12100, UNI EN 13854, ISO 8686, and UNI EN 10204 standards and is issued with the appropriate metal ID plate, conformity certificate, and user and maintenance manual. All our products are covered by a one-year warranty (European Directive).
