Metal post pallet

Metal platform of various sizes stackable with sled

The stackable metal platform with slide is a versatile component designed to offer practical and safe solutions in various contexts. Its structure allows it to be stacked on existing surfaces, providing a robust and secure platform for various applications. Key Features: Stackability: The platform is designed to be stacked, providing an additional surface and maximizing space utilization. Fixing Slide: The presence of a fixing slide allows for secure anchoring, ensuring stability and safety during use. Durable Material: Made of high-quality metal, the platform is designed to withstand wear, ensuring durability over time. Versatility: Suitable for a variety of applications, the stackable metal platform with slide is used in industrial environments, warehouses, loading and unloading areas, and anywhere an additional surface is needed. Our stackable metal platform offers safe handling and easy material management thanks to its compatibility with pallet trucks or forklifts. You can maximize space utilization and simplify warehouse operations, ensuring safe and fast material management. This product is built and tested according to UNI EN ISO 12100, UNI EN 10027-1, and UNI EN 10204 standards and is issued with the appropriate metal label and certificate of conformity. All our products are covered by a one-year warranty (European Directive).
